REASONS FOR ALLOWANCE

1. The following is an examiner's statement of reasons for allowance: The prior art taken either singularly or in combination fails to anticipate or fairly suggest the limitations of the independent claim(s), in such a manner that a rejection under 35 U.S.C. 102 or 103 would be proper. The prior art fails to teach a combination of all the claimed features as presented in claim(s) 1-31, wherein the claimed invention comprises a relatively wide intermediate zone wherein the upper viewing zone and lower viewing zone are such that the ratio of the area of clear vision of the upper viewing zone to the lower viewing zone is less than approximately 3.00 and greater than approximately 2.50; wherein the lens element series exhibits a decrease in the area of the zone clear for distance inside a 22mm radius circle and constrained by the Add/4 diopters RMS power error contour ray traced in the as worn configuration for an infinite object distance with increasing base curve; wherein the difference between maximum and minimum sagittal addition power within each opposed sectors is less than $0.75 \times \text{Add}$ diopters; wherein the distribution of RMS power exhibits a low gradient proximate the distance periphery and a high gradient proximate the near periphery; and a method of selecting a merit function relating to at least one optical characteristic of the lens and solving global minimization using the Finite Element Method, as claimed.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
